• **Long lasting**

• **Wide range of colors**
• **Available in various sizes**
• **Easy to install**

• **Highly durable**
• **Resistant to stains**
• **Non-slip surface**

Parquet

Parquet is a type of wood flooring made of small pieces of wood joined together in a geometric pattern. It is known for its durability and aesthetic appeal.

There are several types of parquet, including solid, engineered, and laminate. Each type has its own unique characteristics and benefits.

Parquet is a popular choice for homeowners looking for a classic and elegant flooring option. It is also a sustainable choice as it is made from natural wood.

Concrete

Concrete is a versatile material that can be used in a variety of ways. It is a durable material that can last for many years. It is also a sustainable material that can be recycled. Concrete is a popular choice for many construction projects.

Quiet Spaces

The design of quiet spaces is a critical component of a modern office environment. These areas provide a respite from the open-plan office, allowing employees to focus, collaborate, and recharge. The design of these spaces should consider factors such as acoustics, lighting, and furniture to create a conducive environment for productivity and well-being.

 Comfort

Work Study

Project: *Work Study* - multi-office study center

The study center is a multi-office study center, designed to provide a flexible and collaborative workspace for students. The center is located in a modern building with large windows and a bright, open atmosphere. The design focuses on creating a comfortable and functional environment for students to study and work together.

The center features a variety of seating options, including round tables and ottomans, as well as a long, curved desk area. The design is modern and minimalist, with a focus on clean lines and a neutral color palette. The center is designed to be a hub for student collaboration and learning.
